CSS

Day 7

Typography:

Text Properties in CSS:

Text properties are CSS styles used to control the appearance, alignment, spacing, and decoration of text on a webpage.

Text Color

Defines the color of the text.

```
h1{
    color: orangered;
}
```

Siddhu

Text Alignment

- Controls how text is aligned inside its container.
- Values:
    - left → default
    - right → aligned to right
    - centre → centered text

```
h1{
    color: orangered;
    text-align: center;
}
h2{
    color: orangered;
    text-align: left;
}
h3{
    color: orangered;
    text-align:right ;
}
h4{
    color:orangered ;
    text-align: start;
}
```

Siddhu

Text Decoration

- Adds or removes decorations from text.
- Values:
    - none → removes underline
    - underline → adds underline
    - overline → adds line above text
    - line-through → adds strike-through
    - underline dotted → custom style

```
h1{
    color: orangered;
    text-decoration: underline;
}
h2{
    color: orangered;
    text-decoration: overline;
}
h3{
    color: orangered;
    text-decoration: line-through;
}
h4{
    color:orangered ;
    text-decoration: underline dotted;
}
h5{
    color: orangered;
    text-decoration: none;
}
```

Text Transform

- Changes the capitalization of text.
- Values:
  - uppercase → ALL CAPS
  - lowercase → all small letters
  - capitalize → First letter of each word capitalized

```
.para1{
    color: green;
    text-transform: capitalize;
}
.para2{
    color: green;
    text-transform: uppercase;
}
.para3{
    color: green;
    text-transform: lowercase;
}
```

Lorem Ipsum Dolor Sit Amet.

LOREM IPSUM DOLOR SIT AMET.

lorem ipsum dolor sit amet.

Text Indent

- Adds space at the beginning of the first line of text.

```
.para1{
    color: green;
    text-indent: 50px;
}
```

Lorem ipsum dolor sit amet.

Lorem ipsum dolor sit amet.

Lorem ipsum dolor sit amet.

```
.para1{
    color: green;
    text-indent: 40px;
}
```

CSS, which stands for Cascading Style Sheets, is a stylesheet language used to describe the presentation and styling of a document written in a markup language such as HTML or XML. It is a cornerstone technology of the World Wide Web, working alongside HTML

Text Shadow

- Adds shadow to text.
- Syntax:
  text-shadow: h-offset v-offset blur-radius color;

```
h1{
    color: orangered;
    text-shadow: 3px 5px 8px yellow;
}
```

Valibasha

Line Height

Controls vertical spacing between lines of text.

```
p{
    line-height: 40px;
}
```

Lorem ipsum, dolor sit amet consectetur adipisicing elit. Aliquid fugit delectus sed sunt deleniti quidem molestiae soluta quo possimus. Nulla adipisci vel beatae saepe dolorem doloribus obcaecati assumenda maxime. Illo atque fuga quae eaque expedita dolor. Eius quia laboriosam omnis.

Letter Spacing

- Adjusts space between characters.

```
h1{
    color: orangered;
    text-shadow: 3px 5px 8px yellow;
}

p{
   letter-spacing: 5px;
}
```

Valibasha

Lorem ipsum, dolor sit amet consectetur adipisicing elit. Aliquid fugit delectus sed sunt deleniti quidem molestiae soluta quo possimus. Nulla adipisci vel beatae saepe dolorem doloribus obcaecati assumenda maxime. Illo atque fuga quae eaque expedita dolor. Eius quia laboriosam omnis.

Word Spacing

- Adjusts space between words.

Font properties:

font-family

- Specifies the typeface (font style).
- Can list multiple fonts (fallbacks).

Categories:

- **Serif** → Times New Roman, Georgia
- **Sans-serif** → Arial, Verdana, Helvetica
- **Monospace** → Courier New, Consolas
- **Cursive** → Brush Script MT
- **Fantasy / Decorative** → Impact

```
.p1{
    color: darkred;
    font-family: 'Times New Roman', Times, serif;
}
.p2{
    color: darkred;
    font-family: Georgia, 'Times New Roman', Times, serif;
}
.p3{
    color: darkred;
    font-family: Impact, Haettenschweiler, 'Arial Narrow Bold', sans-serif;
}
```

font-size

- Defines the size of text.

```
h1{
    color: green;
    font-size: 50px;
}
```

Valibasha

font-style

- Defines the text style.
- Values:
    - normal (default)
    - italic
    - oblique (slanted version)

```
h1{
    color: green;
    font-style: normal;
}

h2{
    color: green;
    font-style: italic;
}
h3{
    color: green;
    font-style: oblique;
}
```

Valibasha

Valibasha

Valibasha

font-weight

- Defines thickness (boldness) of text.
- Values:
  - Keywords: normal, bold, lighter, bolder
  - Numbers: 100 (thin) → 900 (extra bold)

Visibility:hidden; VS display:none;

visibility:hidden;

it hides the element only but the element space is present

display:none;

It hides the both space and element.

```
div{
    width: 100px;
    height: 100px;
    border: 2px solid red;
    background-color: red;
}

h1{
    color: green;
}
h2{
    color: blue;
}
```

Valibasha

Family

```
div{
    width: 100px;
    height: 100px;
    border: 2px solid red;
    background-color: red;
    visibility: hidden;
}

h1{
    color: green;
}
h2{
    color: blue;
}
```

Valibasha

Family

```
div{
    width: 100px;
    height: 100px;
    border: 2px solid red;
    background-color: red;
    display: none;
}

h1{
    color: green;
}
h2{
    color: blue;
}
```
